

Wristbands

SECURITY/DESTRUCTIBLE/SPECIALTY LABEL LINE

More effective than traditional ticket systems, each wristband features a durable adhesive-closure. This adhesive-closure eliminates the ease of tampering and removal, which reduces revenue loss from reuse and pass-along. Using wristbands gives you all-access to successful event management by saving you time.

Material and Design Specifications

- 0.010" (0.254 mm) polypropylene
- 0.003" (0.0762 mm) high performance adhesive
- Features digital printing for complex details/logos
- Serialized/unserialized numbers and barcodes with human readable numbers

Technical Specifications

- All alphanumeric barcodes are digitally printed with human-readable equivalent to guarantee no skips in sequence
- Code 39 with 2.7 to 9.4 characters per inch (CPI) is standard
- Other barcode symbologies include Code 128, I 2 of 5, 2D DataMatrix and QR Code. OCR characters and CPIs are also available

Key Features

- Stunning graphics! Our digital printing process ensures crisp details on even the most complex logos for maximum clarity
- Potential uses include admission for trade shows, amusement parks, events, museums, aquariums and zoos
- Durable permanent materials, no paper layers

Applications

- Access Control
- Event Management

Environmental Specifications

- UV Resistance: Up to 6 months of resistance outdoors
- Chemical Resistance: Resistant to continuous exposure products such as sunscreen, bug spray, soaps, lotions, pool water and ocean water for up to 72 hours.

Test Results

These tests were conducted for a limited period in strict laboratory conditions. To achieve maximum satisfaction, we highly recommend any customer considering use of this product test the labels in the environment in which they will be used.

Chemical Test Summary: Exposure tests were performed on wristbands. These tests included exposure to chemicals/products normally in contact with wristbands at outdoor events and waterparks. All wristbands lose their adhesive bond at 72 hours submerged. This does not occur when the product is applied in normal usage scenarios.
